EDUCATION

B.Sc. Software Engineering
UET Mardan
Expected 2027 · CGPA: 3.55 / 4.00

CORE TECHNOLOGIES

Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries

React.js, Bootstrap, Tailwind CSS

Tools & Platforms

Git, GitHub, VS Code, Vercel, Google Apps Script, Sheets API

Concepts

Responsive Design, Flexbox, CSS Grid, WCAG Accessibility, UI/UX Principles

SOFT SKILLS

- Problem Solving
- Communication
- Team Collaboration
- Time Management
- Quick Learning
- Attention to Detail

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Object-Oriented Programming
- Database Systems
- Computer Networks
- Software Design & Architecture
- Human Computer Interaction
- Web Engineering

CERTIFICATIONS

Website Redesign Certificate
Dept. of CS, UET Mardan · 2025

PROFILE

Software Engineering student with hands-on experience in front-end development and responsive web design. Skilled in HTML, CSS, JavaScript, TypeScript, Git, and modern development tools. Experienced in building accessible and maintainable web applications through academic and competition-based projects. Seeking a Front-End Developer Internship to contribute and further develop practical software engineering skills.

PROJECT EXPERIENCE

UET Mardan Website Redesign

TypeScript · CSS · Vercel | 2025

- ▶ Rebuilt the legacy university website; reduced page text density by 50–60% for 15k+ users.
- ▶ Improved WCAG 2.2 contrast ratio from 3.2:1 to 7.8:1 for low-vision accessibility.
- ▶ Deployment on Vercel cut mobile 3G load time from 4.2s to 1.8s.
- ▶ Awarded Certificate of Excellence by Dept. of Computer Science, UET Mardan.

GitHub: https://github.com/Sobia-iqbal56/UETM_Website-Redesign

Online Book Store

HTML · CSS · JavaScript · PHP · MySQL

- ▶ Built a responsive bookstore with user authentication and product management.
- ▶ Implemented full CRUD operations with MySQL database integration.
- ▶ Added search and category-filtering features; used Git/GitHub for version control.

GitHub: <https://github.com/Sobia-iqbal56/Online-Book-Store>

Weather Dashboard | Personal Project

Tech: React, JavaScript, CSS Modules, OpenWeather API, Vite 2026

– Built a full-featured weather dashboard from scratch with live city search, geolocation-based lookup, and a 5-day forecast derived by aggregating a 40-entry, 3-hour-interval API response into daily summaries. – Designed a custom CSS design-token architecture powering persistent dark/light themes, plus a live-updating clock that computes real local time for any searched city using UTC-offset conversion.
